

## PROFILE

I build automated systems testing tools for next-generation flight management software, turning complex engineering workflows into repeatable, observable systems.

## PROFESSIONAL EXPERIENCE

### Software Engineer I Collins Aerospace

2026 - Present / Full time

Developing automated systems testing tools for the next-generation Flight Management System.

- Build and maintain automated test tooling for FMS Next Gen.
- Turn manual workflows into repeatable, dependable test execution.
- Improve the observability and reliability of internal engineering tools.

### Software Engineering Co-op Collins Aerospace, Next Gen Systems

Jan 2024 - 2026 / Cedar Rapids, IA

- Verified Flight Display System applications on simulation rigs.
- Developed automated systems testing software for repeatable engineering workflows.
- Produced technical documentation for production engineering work.

## EDUCATION

### Iowa State University Bachelor of Science in Software Engineering

Graduated May 2026  
Ames, IA

GPA 3.70

## TECHNICAL TOOLKIT
